Water to Beach Signals

(May be conducted from any craft or boat)

Tower and other Signals

A full description of signals is available on page 119 of the 33rd Edition of the Public Safety and Aquatic Rescue Working Manual

www.slsa.com.au

Signal	Action	Meaning
<p>Submerged Patient Missing (Code X)</p>	Both arms raised to form a cross above the head	This is the most serious signal of all. A swimmer is missing and presumed submerged. Other lifesavers on shore or the pool deck should immediately fix the position of the lifesaver and initiate an appropriate response.
<p>All Clear/OK</p>	Touch the middle of the head with the fingertips of one hand	The lifesaver is indicating that no help is required in performing the rescue and that the patient is stable. However, other lifesavers should continue to observe and monitor the situation as the situation can deteriorate
